

Loop card esserbus/esserbus-PLus module GI for FlexES Control

Part-No. FX808332

Approval: FM, EN54

As FX808331, but with galvanic isolation (GI). The galvanic isolation ensures that any disturbances on one loop do not interfere with the other loops and with the panel itself. Modules are locked mechanically without screws in the slots, just quick & easy. HOT PLUGGING and automatic recognition of modules just by Plug & Play, makes start-up and maintenance easy to handle.

Features:

- If more than 4 loop modules are used in a panel, galvanic isolation is required

Operating voltage	24 V DC 30 mA
Quiescent current	approx. 30 mA
Weight	approx. 140 g
Dimensions	W: 27 mm H: 93 mm D: 112 mm
